

Our World is Water

EUROWATER
PURE WATER TREATMENT

Pure water treatment since 1936

EUROWATER was founded in 1936 to provide pressure filter plants for treatment of water for the co-operative dairies in Denmark. Today, our expertise includes a broad and extensive knowledge about water treatment and we supply to customers worldwide within any line of business.

All our efforts are devoted to develop, manufacture, and market complete water treatment solutions. Our experience consists of pretreatment water for countless waterworks and private water supplies as well as various fields of application within all kinds of industrial companies as well as institutions.

We are an independent company with 400 highly qualified employees of which almost half is employed in Denmark at our main office and factory.

Internationally, we are represented in most of the European countries – either through subsidiary companies or local distributors who are all water treatment specialists.

Our relations with employees, customers, and co-operators build on close long standing relationships.

Water treatment across industries

On the strength of a broad product range, long experience, and a great commitment, EUROWATER is in a position to carry out

projects within any industry and field of application – traditional as well as special.

Reliable plants – with guarantee

EUROWATER manufactures long-life water treatment plants with high reliability of operation. The basis is thorough knowledge of water treatment, both theoretical and practical, together with proven and recognized technologies and components.

Our engineering group is continuously engaged in innovations and improvements of products and solutions. The work is optimized in close co-operation with our suppliers and customers.

Our long experience and modular designed products guarantee high reliability of the plants, short delivery time, and competitive prices.

Frame-mounted CU:RO compact unit; a complete reverse osmosis system with integral pretreatment on a single stainless steel frame – ready for use.

Complete water treatment plant in container – ready for use.
Available as rental unit and for sale.

From water analysis to turn key solutions

EUROWATER's water treatment plants come in a wide range, that is, almost every demand can be met through the use of standard modules. We also involve ourselves in more special projects. Besides consultancy and sale, we offer installation, start-up, and after sales service.

Standard product range

- Pressure filter plants
- Softening plants
- Demineralization plants
- Mixed-bed plants
- Reverse osmosis plants
- Nanofiltration plants
- Filtration plants
- Dealkalizers
- Deaerators
- Dosing pumps
- Activated carbon filters
- UV-disinfections plants
- Electrodeionising plants
- Selective ion exchange plants
- Container plants
- Plants for rent
- Special plants

Water treatment plant producing $3 \times 25 \text{ m}^3 / \text{h}$ ultrapure water for a chemical company. The installation consists of three individual frame-mounted lines, each with reverse osmosis with a water saving plus-stage, followed by an EDI system.

Pressure filter plant type TFB 14.

Softening plant type SMH 602.

We provide full documentation for both service and preventive maintenance.

After sales service

EUROWATER has an international sales and service organization with an experienced staff of engineers and service technicians at your service.

For us, service involves both solutions to urgent problems, maintenance, and preventive service.

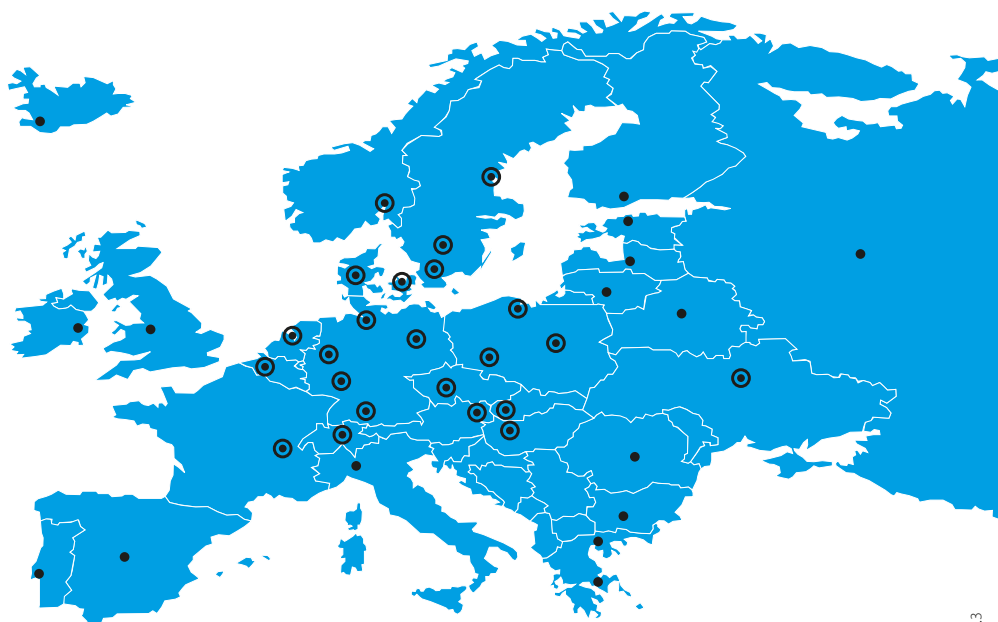

Our after sales service is characterized by immediate identification and prompt solution of the problems. Our service technicians are highly skilled and our service cars are equipped with a broad range of spare parts, mainly of our own make. We continuously supply spare parts for more than 25-year-old plants.

International water treatment network

EUROWATER is an international group with subsidiary companies in 14 countries servicing our customers through 23 local offices. The company is represented in most of Europe through dealers that are all water treatment specialists.

The network provides a broad surface of contact to the world market and positions us as one of the leading suppliers of water treatment equipment in Europe.

The widespread geographical distribution also implies that local customs, language, and legal issues are well known.
